

# KLAUS OKKELBERG

484-226-8020 • kokkelberg@gatech.edu • US Citizen

## OBJECTIVE

Electrical engineering Ph.D. candidate seeking an internship for summer 2017 in any geographical location

## EDUCATION

**Georgia Institute of Technology**, Atlanta, GA

2014–present

Ph.D. candidate in Electrical and Computer Engineering

*Research:* Developing DSP algorithms of a mobile speech capture system for help with speech disorders and accent reduction. Uses machine learning and information fusion to provide audio/visual performance feedback

GPA: 3.8/4.0

**University of New Orleans**, New Orleans, LA

2014

M.S.E. in Electrical Engineering

*Thesis topic:* Nonlinear filtering for battery health management

GPA: 4.0/4.0

**The Pennsylvania State University**, University Park, PA

2011

B.S. in Electrical Engineering

Schreyer Honors College Scholar (Representing the top 1% of Penn State students)

*Honors Thesis topic:* Nonlinear control system for nuclear magnetic spectroscopy

GPA: 3.8/4.0

## EXPERIENCE

**Georgia Tech**, Atlanta, GA

**Teaching Assistant**

Aug. 2016 –  
Dec. 2016

- Graduate TA for GaTech ECE 3030, Physical Foundations of Computer Engineering, with 71 students
- Responsible for grading all assignments as well as answering questions in and out of class

**Grader**

Aug. 2016 –  
Dec. 2016

- Grader for GaTech Math 4221, Stochastic Processes, with 37 students

**Teaching Assistant**

Aug. 2015 –  
May 2016

- Graduate TA for GaTech ECE 2031, Digital Design Lab, part of the school's Undergraduate Professional Communication Program, with 70 students over 2 semesters
- Taught good writing style through 1-on-1 consultations for three technical reports
- Responsible for giving and grading weekly quizzes and lab reports

**Xilinx, Inc.**, San Jose, CA

**Intern**

June 2014 –  
Aug. 2014

- Improved computer mathematical modeling of physical, 16 nm field-programmable gate array (FPGA) devices through Cadence modeling and Matlab/Verilog simulation
  - Increased accuracy of model to physical result by 20%
  - Improved speed by a factor of 15
- Developed theoretical model of switching noise magnitude
- Added unattended simulation functionality

**University of New Orleans**, New Orleans, LA

NASA-funded **Research Assistant** under Dr. Huimin Chen

July 2012 –  
May 2014

- Studied accuracy and speed of various nonlinear filters as related to estimating battery state of charge
- Researched use of Extended Kalman Filter for highly nonlinear systems through stochastic gradient estimation
- Proposed adjustments to the Unscented Kalman Filter and the Cubature Kalman Filter that increase filtering stability and accuracy

**Pennsylvania State University**, University Park, PA

**Research Assistant** under Dr. Jeffrey L. Schiano

March 2010 –  
May 2011

- Researched a marginal oscillator with a nonlinear feedback element for use in nuclear magnetic spectroscopy
- Studied sampled-data implementation in the presence of thermal noise
- Derived sensitivity of a Robinson marginal oscillator
- Optimized speed of simulation model by a factor of 100

## PROJECTS

- Determined performance of MIMO configurations for LTE-Advanced
- GoPro-based underwater fish recognition and tracking using FAST SURF feature matching and dark channel prior transmission map estimation
- Detection of battery short circuit using high-gain adaptive observer
- Video jitter removal and stabilization using point feature matching and phase correlation
- Image reconstruction from incomplete, quantized measurements using discretized solution of Euler-Lagrange equation
- Estimation of vehicular dynamics through dual nonlinear filtering of vehicle state and operating parameters
- Investigation of resonant tunneling through a double-barrier diode
- Quantum interference visibility in an oscillating macroscopic mirror
- High-speed adaptive decision feedback equalization for SerDes communications

## NOTES

**Software:** Matlab, Simulink, PSPICE, Multisim, Mathematica, AutoCAD, Solidworks, GIT, Photoshop, MS Office

**Programming:** Matlab, Fortran, C, Java, Python, Visual Basic, Perl, Tcl/Tk, LabView, LaTeX

**Social Skills:** Good communication skills, strong problem solving ability, excellent at teamwork
